The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Creek County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Ellis County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Garfield County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Garvin County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Harper County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Johnston County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018Est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Latimer County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Le Flore County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Lincoln County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Love County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Mayes County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - McIntosh County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018 est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018Est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018 est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Ottawa County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018 est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (>50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
Case Count by Date of Onset and Estimated Cases per 100,000 Population - Sequoyah County, OK as of 7/23/2020

The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed). The data is filtered to include dates on or after 3/1/2020.
The above graph displays the number of cases reported for a given county by date of symptom onset or date of test for asymptomatic cases. The circles represent the estimated cases per 100,000 population (US Census 2018est) based on a 7 day average. Colors indicate the risk level (extreme risk levels (> 50) are not displayed).
