<b>DLO Transplant Immunology Laboratory</b>	150	EZ1 Viral Mini kits, AVL Buffer from Qiagen	EZ1 Viral RNA extraction kits and AVL buffer from Qiagen.
<b>IMMY Labs</b>	200	Liquid Handling Robots	We are adding capacity daily and hourly. Our main rate limiting step at this point is sample intake and reporting. As a new CLIA lab, we have had to build that capability into our system. We are adding robotic systems this week to increase our processing and testing capacity. The RNA extraction process is the next rate limiter, so we are developing an in-house magnetic bead system so that we do not have to rely on commercial kit manufacturers.

LABORATORY	AVERAGE NUMBER OF SPECIMENS THAT CAN BE PROCESSED (REPORTED) PER DAY	REAGENTS ON ORDER	WHAT RATE-LIMITING RESOURCE IS PREVENTING YOUR LAB FROM MAXIMIZING CAPACITY
Regional Medical Laboratory	344	Abbott amp kits, reagent kits, pipette tips for m2000 Diasorin amp kits	We are currently limited by staffing as we transition COVID 19 testing to a 24/7 operation. This is currently being addressed, and additional staff have begun training for processing and testing of specimens. Additionally, we are limited by manufacturing - orders are not being completely filled and we are often not aware of just how much will be shipped to us. We have attempted to secure large lots for testing, and only receive capacity for 2-4k patient tests a week so far.
Reynolds Army Health Clinic	48	2,000	We currently send samples to a military reference laboratory as well as going live in-house today. Rate limiting resource is the VTM required for specimen collection as well as testing kits for our BioFire FilmArray in-house
Saint Francis Health System	279	4,990	Availability of Reagents and Collection supplies.
